

FALCOM

Empowering those  
who protect us

A close-up photograph of a FalCom system module mounted on a tactical vest. The module is a tan-colored, modular device with several connectors and cables. It is labeled with 'PTT', 'EUD', 'FALCOM', 'DATA', and 'POWER'. A black antenna is attached to the top. The module is mounted on a tan-colored tactical vest with a camouflage pattern. A black strap with a yellow buckle is also visible.

# FalCom Systems

The modular FalCom system offers unrivaled modularity and open compatibility delivering flexible, scalable communication and hearing protection solutions for every mission.

## True Audio, Data, and Power Enabled System

Complete Audio, Data, and Power integration ensures seamless connectivity across all components, reducing cable clutter, simplifying logistics, and enabling future-proof interoperability.

## User-Centric Design & Cognitive Load Reduction

Advanced features like spatial 3D audio, true left/right separation, and natural, high-fidelity hear-through optimize situational awareness and minimize operator fatigue.

## Minimal Footprint & Carrier Friendly Design

The markets smallest control units combined with thoughtful cable management - such as tilted and angled connectors - reduce bulk and snag hazards, maximizing usable carrier and vest real estate investment and enabling operational growth.

## Modular & Scalable Architecture

Flexible, plug-and-play modularity lets customers tailor their systems - from simple single radio setups to complex multi-channel networks - protecting investment and enabling operational growth.

## Market Leading Power Efficiency

Designed for extreme endurance, FalCom systems deliver exceptional power management that significantly extends operational time with minimal impact on radio battery life - keeping operators' mission ready longer.

## An unmatched portfolio

FalCom transform the way operators communicate and protect their hearing in the most demanding environments. Leveraging advanced Audio, Data, and Power (ADP) enabled connectivity, we deliver mission-ready tactical communications and scalable hearing protection in a single, seamlessly integrated ecosystem. Every component is designed to maximize flexibility, minimize operational burden, and ensure that users maintain situational awareness, enhanced safety, and peak performance.

# FalCom Pods Pro

The best just got better with enhanced capabilities, five wearing styles, and premium contoured cushions for superior comfort and adaptability.

- ✓ Situational Awareness with patented natural-sounding Hear Through technology
- ✓ Integrated PTT buttons for keying radios, EUDs and ICS
- ✓ Multiple wearing styles with all-new FalCom Top, Rear, and Mid-Cut mounting options
- ✓ Three contoured ear cushions (original, memory foam, gel)
- ✓ Left/Right swappable Boom Microphone

# FalCom Pods Pro High

The industry's highest level of hearing protection with superior comfort and modularity for extreme tactical environments.

- ✓ Unsurpassed protection with 32dB noise reduction and enhanced Situational Awareness
- ✓ Integrated PTT buttons for keying radios, EUDs and ICS
- ✓ Designed for High Cut helmets with all-new FalCom Top and Rear mounting options
- ✓ Three contoured ear cushions (original, memory foam, gel)
- ✓ Left/Right swappable Boom Microphone

# FalCom Hub Mini

No Cover

Full Cover

Compact single com control unit, engineered to operate two dual-net radios with unmatched efficiency.

- ✓ True Audio, Data and Power
- ✓ Capable of running two dual channel radios
- ✓ Left/Right separation
- ✓ Ultra-low power consumption
- ✓ Integrated covers

# FalCom Hub

No Cover

Full Cover

The world's first three com true ADP control unit - refined and relaunched: Smaller footprint, tougher build, and next-level performance.

- ✓ A true Audio, Data and Power enabled control unit
- ✓ Capable of running three dual channel radios or EUD / ICS
- ✓ Left/Right separation
- ✓ Ultra-low power consumption
- ✓ Integrated covers

# FalCom Hub Max

No Cover

Full Cover

The world's first and smallest five com true ADP control unit, engineered for the perfect fit and unmatched multi-device performance on critical missions.

- ✓ A true Audio, Data and Power enabled control unit
- ✓ Capable of running three dual channel radios, EUD and data
- ✓ Left/Right separation
- ✓ Ultra-low power consumption
- ✓ Integrated covers

# FalCom Dock

The smallest tactical data hub delivering full audio, data, and power distribution for enhanced battlefield connectivity.

- ✓ Full Audio, Data, and Power distribution
- ✓ Four port USB hub for audio and data devices and power
- ✓ USB Audio and EUD control
- ✓ Seamless MOLLE integration

# FalCom Push

FalCom  
Push

FalCom  
Dual Push

Back to basics with pure, ergonomic PTT functionality and seamless MOLLE integration for reliable frontline communication.

- ✓ Single, dual and twin push configurations
- ✓ High tactile buttons for easy keying
- ✓ Custom configurations for tactical radios and EUDs
- ✓ Straps for MOLLE integration
- ✓ Mounts vertically and horizontally

## About FalCom

FalCom is a pioneering Danish company dedicated to enhancing the effectiveness and safety of defense, security, and law enforcement professionals worldwide. As an independent brand within the GN Group, we draw from over 150 years of unparalleled audio expertise, seamlessly combining innovation across medical, consumer, professional, and military audio sectors under one roof. This unique heritage empowers FalCom to deliver trusted technology and scalable systems to elite units and government agencies across NATO and allied nations.

## Empowering those who protect us

Our mission is simple yet profound: empowering those who protect us. We provide advanced communication and hearing protection solutions engineered for the demanding conditions of extreme environments and critical decision-making. Through relentless investment in research and development, FalCom continually redefines situational awareness, operator comfort, and audio clarity - helping reduce cognitive load while delivering market-leading tactical communications with virtually limitless integration possibilities.

What truly distinguishes FalCom is our commitment to choice and flexibility. Our modular systems are tailored for the diverse operational needs of our customers, offering seamless communication and robust hearing protection from individual operators to multi-channel mission teams.
